

BAIT & FEED COMPANY Custom Rolling

The Bait & Feed Company offers the opportunity to have any bait expertly rolled to your exact requirements. Whether it's your own recipe or a favourite from a well-known bait firm, your requirements will be accommodated. Boilies from 12mm to 24mm, barrel-shaped boilies down to 10mm, boilie chops, paste, boilie crumb, air-dried baits, hardened hook baits and hi-viz pop-ups all rolled precisely to the manufacturers' standards. For instance, Mainline Cell rolled by The Bait & Feed Company is identical to that made by Mainline itself. The only difference, of course, is that there are more options available to you regarding the baits' size and shape.

On top of this, should you want to experiment with, or customise, your baits to gain an edge then The Bait & Feed Company will add, swap or remove ingredients on your say so. What you have, therefore, is the freedom to tailor your baits to the nth degree without having to invest the time, effort and mess involved in rolling your own. Imagine having Activ-8 rolled with added plum? Hmm, sounds good.

You may be thinking that such a service has to come at a price, but buying bait from The Bait & Feed Company won't set you back any more than if you purchase boilies at retail price from anywhere else. What's more, there are bulk boilie deals and various free-postage deals available as well.

Ordering bait in such a fashion, be it over the phone, e-mail or Internet, carries the concern of having the bait delivered. Obviously, you want the bait in time for your session and it needs to be fresh, so all orders are guaranteed for delivery within three days of making your order. What's more, whether you're ordering 5kg or 500kg, you will always receive the absolute best customer service.
